

EXTENDED-RANGE TWIN-ENGINE OPERATIONAL CAE PERFORMANCE STANDARDS (ETOPS) 2022-2023

SUMMARY

This course covers the ETOPS concept, including long range operations and operational practices.

The course emphasizes planning considerations, including weather minima, the selection of alternate airports, fuel requirements and considers practical in-flight considerations, such as component failures, MEL/CDL Items and diversions.

TARGET POPULATION

The Pelesys ETOPS course is designed for experienced Airline Pilots requiring initial or recurrent ETOPS training.

REGULATORY COMPLIANCE

- EASA / FAA / Transport Canada
- Maintain compliance with IOSA standards

*Please also note that we have an EDTO course in the following version: ICAO.

Versions Available: EASA / FAA Course Length: 45 min
