SUMMARY

This course presents an introduction to command for flight crews.

The course covers the basic concepts of motivational leadership, communication skills, and conflict resolution. Particular emphasis is placed on strategies and techniques for successful workload management, conflict management, good CRM practises and the roles and responsibilities of the Senior First Officer position.

The course includes a scenario that applies all of the leadership and communication skills to a simulated in-flight emergency scenario.

TARGET POPULATION

The Pelesys Introduction to Command course is intended for experienced Airline Pilots. In particular, the course is presented for pilots upgrading to Senior First Officer positions.
